ENHANCING THE LEARNING ENVIRONMENT

The use of devices will vary from day to day depending on the nature of the learning activity. They will complement the normal teaching program and will be integrated across all learning areas.

HOW DOES THE PARENT FUNDED BYOD PROGRAM WORK?

For your child to gain maximum benefit from this program you will need to purchase or lease a device for your child to use at school next year.

We have secured very competitive deals from our partners JB HiFi and Winthrop Australia.

Alternatively, parents may wish to purchase a device from another source.

Parents can order through the following portals:

**JB Hi-Fi:**
School Code: LSHS2017

**Winthrop Australia:**

*Care • Commitment • Challenge*
At Lynwood Senior High School our purpose is to provide an outstanding educational environment which promotes and encourages student success. We place the needs of our students first and foremost at all times and strive to prepare them for the dynamic and challenging world in which they live. Making effective use of technology is increasingly vital in this changing world and it is for this reason that we are endeavouring to implement the BYOD Program to our school and for our students.

WHAT IS A BYOD PROGRAM?
A BYOD Program is a parent funded program in which participating students own and use their own Device for use at school and home, enabling a more student-centred, experience-rich education relevant to the 21st Century. Students develop skills, work habits, attitudes and expertise that will prepare them for success and help them to become efficient and effective life-long learners.

EMPOWERING OUR STUDENTS FOR A CHANGING WORLD
Technology is increasingly integral to learning in our ever changing world. The BYOD program maximises the learning environment, builds stronger links between the home and school learning environments and empowers students to take more control of their learning.

CARE   •   COMMITMENT   •   CHALLENGE

OUR VISION FOR THE PROGRAM
A technology enhanced learning environment suitable for the 21st Century

WHY A BYOD PROGRAM?
Participation in this BYOD Program provides students with their own device to which they have permanent access. Its benefits include:

- Increased access to information and improved research and analytical skills.
- Students directing their own learning and more readily engaging in problem-solving, critical thinking and practising skills at their point of need.
- More time spent engaging in collaborative work and participating in project-based instruction.
- Using device has been shown to lead to more student writing and writing of a higher quality. Students also spend more time doing homework when they have access to their own computer.
- Increased student participation and engagement and achievement enabling students to connect with experts and other learners anywhere in the world.
- The provision of an enhanced learning environment fostering a learning style that promotes student self-reflection, goal setting and greater feedback between teacher and student.
- Strengthened connection between home and school encouraging shared learning and strengthening three way communication between teacher, parent and student while also giving opportunities for students to enhance their academic development beyond the classroom.
